

Name Surname

Software Engineer · Berlin, Germany
github.com/username · linkedin.com/in/username · fosstodon.org/@username · username@example.com

SUMMARY

Engineer working on build tooling, static compilers and the unglamorous parts of developer experience. I like systems that stay fast as they grow, and documentation that tells you why rather than what.

EXPERIENCE

Staff Software Engineer

Mar 2024 – Present

Northwind Systems · Full-time · Hybrid · Berlin, Germany

- Lead the build platform team. Rebuilt the incremental compiler so that a change to one page no longer invalidates the whole dependency graph, cutting median CI time from 9 minutes to 40 seconds.
- Own the release process and the internal documentation site used by around 200 engineers.

Go, Kubernetes, Compilers, Build Systems, Observability

Maintainer

May 2021 – Present

Static Web Collective · Volunteer · Remote

- Maintain a set of open source static site tools. Review contributions, cut releases and answer far more questions about YAML indentation than expected.

Open Source, Node.js, Technical Writing

Senior Software Engineer

Jan 2022 – Feb 2024

Example Corp · Full-time · On-site · San Francisco, CA

- Built and maintained customer facing web applications in React and Node.js. Introduced a design system that removed roughly 40% of the duplicated CSS across four product surfaces.

JavaScript, React, Node.js, Design Systems

Backend Engineer

Mar 2021 – Dec 2021

Meridian Labs · Contract · Remote

- Six month contract to build billing services and a public REST API, then extended to cover the migration off a single Postgres instance.

Python, PostgreSQL, API Design

Software Engineering Intern

Jun 2020 – Sep 2020

Meridian Labs · Internship · Remote

- Wrote the internal tool that turned support tickets into reproducible test cases. It is somehow still in production.

Python, Testing

EDUCATION

M.Sc. Computer Science

Sep 2022 – Jun 2024

University of Example · Master's Degree · 1.3 GPA

- Thesis on incremental compilation for document trees, supervised by the programming languages group. Parts of it became the ICWE paper below.

B.Sc. Computer Engineering

Sep 2018 – Jun 2022

University of Example · Bachelor's Degree · 3.64 GPA

- Focused on software development and algorithms. Capstone project applied machine learning to triage in a hospital admissions dataset.

PUBLICATIONS

PROJECTS

Open Source Static Site Engine	Jan 2023 – Present
High-performance static site generator powered by YAML configuration and Markdown files.	
glyphd: a Font Subsetting Daemon	Aug 2024 – Present
A long-running service that subsets and caches web fonts on demand, so a page ships only the glyphs it actually uses.	
Lattice: a CSS Grid Debugger	Apr 2022 – Nov 2022
A browser extension that overlays grid and flexbox geometry, with a keyboard-driven inspector for track sizing.	

SKILLS

Distributed Systems, Go, TypeScript, Compilers, Kubernetes, Algorithms, Cloud Architecture, Node.js, Research, Academic Excellence, AWS, Build Systems, DevOps, Incremental Computation, Performance, Python, Technical Writing, Terraform, Web Performance, Android, API Design, Architecture, AST, Benchmarking, Browser Extensions, C++, Caching, Cryptography

CERTIFICATIONS

Professional Cloud Architect — Google Cloud	Mar 2026
Certified Kubernetes Administrator — The Linux Foundation	Feb 2025
AWS Certified Solutions Architect – Associate — Amazon Web Services	Sep 2024
AWS Certified Solutions Architect - Associate — Amazon Web Services (AWS)	Apr 2023
Terraform Associate — HashiCorp	Nov 2022

AWARDS

Best Student Paper — International Conference on Web Engineering	Nov 2023
Faculty High Honors Graduate (Rank 2) — University of Example	Jun 2022
Honor Graduate — Example University	Jun 2022
